

STAINLESS STEEL VINIFICATION HATCH

Discover our new vinification hatch, designed to improve the operational efficiency of your cellar. A practical and intelligent option for wine producers looking to optimize their winemaking working methods.

STAINLESS STEEL VINIFICATION HATCH

VINIFICATION RANGE

EASY FILLING

The addition of a hatch on the front provides direct access to the interior of the barrel and thus facilitates the transfer of the harvest. It is therefore no longer necessary to remove the base, offering ease of use and considerable time savings.

EASE OF USE

The hatch is equipped with a locking mechanism, guaranteeing quick and easy opening.

OPENING WITH A KEY

ADAPTABILITY AND FOOD SAFETY

Made of stainless steel, the hatch guarantees the food safety of the barrel. Two formats are available, each model adapts to several barrel capacities, providing a flexible solution for winemaking of all sizes.

ALSO DISCOVER OUR VINIFICATOR

From 300 to 600 liters.
Delivered with Ø 40mm ball valve, Ø 200mm cylindrical hatch, a galvanized steel rack with four-wheel rotation and a fork location for forklift.
